This is a powerful app that lets you create 3D models from images. It uses photogrammetry technology to integrate the area around the image to make a 3D model. The tool can be used with images from any camera or scanner, even those from phones and digital cameras which produce images at up to 7 mega-pixels per square inch. Images may also be imported from .JPG, .BMP, PNG, TIFF and RAW formats for faster processing. This program is very easy to use and handles all kinds of models with ease – creating automobiles or human beings as well as objects such as a house or a plant. This software goes beyond simple drawing by adding depth and detail in your design project. Other features include: Easy To Use: This app is very easy to use and has a simple and intuitive interface and can be used by beginners and professionals alike. It does not require any scripting, programming or video game skills. It also has a project manager which helps manage your files in an easier way. The software can also be used for other 3D applications such as games, animations, architectural visualizations and art projects. Photogrammetry Technology: This app uses photogrammetry technology to create 3D models from images which usually take up to minutes while similar software may take up to days or weeks to do the same task. Moreover, 3D graphic processing is done without using any video game engines or specific image formats. Flexible: It can work with images from scanners, cameras and phones which produce images at up to 7 mega-pixels per square inch. Also, it can import JPG, BMP, PNG, TIFF and RAW formats for faster processing. Easy Navigation: This app has an advanced navigation engine that helps in easy management of images and models during the design process. It also includes a project manager which keeps track of all your files. Variety Of Models: The software allows the user to create different types of 3D models including automobiles, humans and others.

Windows 8 compatible. Version 1.0 released on 2010-12-02. Version 2.02 released on 2011-04-20. Version 2.03 released on 2011-05-31. Version 2.04 released on 2011-06-08. Version 2.05 released on 2011-06-15. Version 2.06a released on 2011-08-12.. Version 3 available soon!
