

Fully customize your keyboard shortcuts. KEYMACRO allows you to program your keyboard shortcuts, so that you can easily launch any program with a simple keyboard shortcut. For example, you can set a shortcut to launch your favorite IM program, or your favorite browser. Or launch your "favorite" program every time you press the Windows key. With a little tinkering, you can add, delete, and modify existing keyboard shortcuts, as well as create custom shortcuts. It allows you to change existing shortcuts, so that you can quickly access applications or tasks you use often. KEYMACRO Features: * Handles simple and complex keyboard shortcuts. * The program takes over your keyboard shortcut keys. * Supports more than 40 input languages, with customizable shortcuts for each one. * Keyboard shortcuts can be created for every application that you want to use. * You can add, modify, and delete existing keyboard shortcuts. * You can create your own shortcuts to launch any program. * It can be used in combination with your favorite programs and browsers. * It can modify keyboard shortcuts used by Windows. * It can be used in combination with your favorite operating systems. * You can create keyboard shortcuts for any application or browser. * You can easily change a single keyboard shortcut to launch an application or browser, without having to create a complex macro. * The program easily handles complex keyboard shortcuts. * You can use the program for one or several keyboards. * You can adjust keyboard shortcuts for any language. * You can create keyboard shortcuts that launch applications or browsers, or that change any system-wide settings. * You can customize keyboard shortcuts for your favorite programs and browsers. * You can customize keyboard shortcuts for any language. * You can easily change a single keyboard shortcut to launch an application or browser. * You can easily create keyboard shortcuts for any application or browser. * You can easily create keyboard shortcuts for any language. * You can easily change any keyboard shortcut. * You can easily create new keyboard shortcuts. * You can easily create new keyboard shortcuts. * You can easily change any keyboard shortcut. * You can easily create keyboard shortcuts for any application or browser. * You can easily create keyboard shortcuts that launch applications or browsers. * You can easily create keyboard shortcuts for any language. 70238732e0
