Also, sometimes a user has different CCCam configurations for different purposes, such as when one is willing to share the line on non-commercial but the other is willing to keep it on a private use only. So the CCCam.cfg is actually a convenient file to share the information. Warning: To make a CCCam.cfg file with the settings shown  
above, you must make sure that you have CCcam V1.3d and more than 10 CCCam cards in your CCCam. Source: A: First of all, welcome to SED. You'll find here a lot of users who are willing to help you. My 2d92ce491b
