```
@POST("/api/user") public void postdata(@Body String json){ Gson gson = new Gson(); JSONArray jArray = gson.fromJson(json, JSONArray.class); } when i get the value of jArray i am getting the string as follows [{"name":"user","age":"21"},{"name":"user","age":"21"}] how can i convert to JSON object array i am using spring boot A: You can use another solution for converting your String to JSONArray as following: Gson gson = new Gson(); String response = "{\"name\":\"user\",\"age\":\"21\"}"; JSONArray jsonArray = gson.fromJson(response, JSONArray.class); System.out.println(jsonArray); Output: [{"name":"user","age":"21"}] A: Read up on JSON and it's better alternatives. You shouldn't use Strings to store JSON. Ambivalent DNA alkylation by platinum complexes: the DNA structure and DNA-platinum binding influence the pattern of strand breaks. Pt(II) complexes with the N4 and N7 ligands form alkali-labile DNA adducts, which are believed to be responsible for the cytotoxicity of Pt drugs. Two models for the formation of DNA crosslinks have been developed on the basis of the alkaline nicking assay and the T4 ligase restriction assay. In the present work we show that the pattern of DNA breaks as assayed by

License4J License Manager Crack+

KeyM macros are macros that use an embedded password to protect and/or encrypt

data. The concept is simple: the macros call a password protected subroutine that must be provided by the developer. The password is entered by the developer using a KeyMacro (similar to a text password in the Windows password manager).

RanData Description: RanData is a visual data package designed to produce forms, charts and data sets that run on any platform. RanData creates forms that display data in an organized and easy to read way and charts that can be used to compare data.

Sign-in Description: Sign-in is a text to speech engine that enables you to convert text to speech in Mac OS X. The user interface is fairly easy to use, and provides many customizations. Moreover, it is easy to carry out a language localization and it supports 13 languages out of the box. It is also an embedded component that is launched every time you launch a Mac application. It can also be launched from the Dock.

CommonCrypto Description: CommonCrypto is a cryptographic library (security tool) for Mac OS X that provides the following features: Generate random numbers Generate keys Encrypt/decrypt data Randomize IVs in CBC mode Add HMAC Add RSA padding Check whether a certificate is valid Check whether a certificate belongs to a trusted certificate authority

RSA Key Storage Description: RSA Key Storage is a tool that helps you manage the storage of various data including secret information, passwords and usernames. It provides a high level of encryption. It is designed to be used in conjunction with other security tools.

CommonCryptoDescription CommonCrypto is a cryptographic library (security tool) for Mac OS X that provides the following features: Generate random numbers Generate keys Encrypt/decrypt data Randomize IVs in CBC mode Add HMAC Add RSA padding Check whether a certificate is valid Check whether a certificate belongs to a trusted certificate authority

IMP Description: IMP is a network analysis tool for OS X. IMP allows you to analyze traffic, run protocol and port scanners, check for open ports and identify network devices. You can even use a custom script to inspect the traffic.

RSA Key Storage Description: RSA Key Storage is a tool that helps you manage the storage of various data including secret information, passwords and usernames. It provides a high level of encryption 77a5ca646e

License4J License Manager Crack Activation

License4J License Manager is a software program that provides users with a simple means of generating licenses and serial numbers, and sending them to people through an SMTP server. Quick installation and clean interface The setup process runs smooth, without offering to download any products that are not actually necessary for the product to work properly. After completing it, you are greeted by a minimal and straightforward GUI, as it is only comprised of a menu bar, a folder structure and a pane in which to display license details. Furthermore, extensive Help contents are integrated, thus making sure that even novice users can work with it, without facing any kind of difficulties. Information you have to append This software tool enables you to create an unlimited number of licenses, with the help of a wizard, which will guide you every step of the way. You are required to input a number of details, including user info (name, company, address, e-mail, phone etc.), hardware ID, activation period (if required) and license type. When it comes to the latter, you can choose between a text, floating text and key (basic, cryptographically secure or online). Batch processing, sending mails and export capabilities It is also possible to create multiple licenses in the same time, with the help of a previously created template. After generating them, you can easily bring up the source code and copy it to the Clipboard, tests the licenses and export them to a proprietary format (L4J), CSV or XLSX. You can send the created items to people through an SMTP server while also configuring the message, so as to convey a particular tone. Backup and restore capabilities are also offered, so that you can easily prevent sudden data loss. Conclusion To wrap it up, License4J License Manager is a pretty efficient piece of software when it comes to generating product licenses. The interface is intuitive, the response time is good, the system's performance is not going to hampered and our tests did not reveal hangs, errors or freezes. What's New in the License4J License Manager?

License Manager is a product which creates digital products for Windows. The system provides a simple means of generating licenses and serial numbers, and sending them to people through an SMTP server. Quick installation and clean interface The setup process runs smooth, without offering to download any products that are not actually necessary for the product to work properly. After completing it, you are greeted by a minimal and straightforward GUI, as it is only comprised of a menu bar, a folder structure and a pane in which to display license details. Furthermore, extensive Help contents are integrated, thus making sure that even novice users can work with it, without facing any kind of difficulties. Information you have to append This software tool enables you to create an unlimited number of licenses, with the help of a wizard, which will guide you every step of the way. You are required to input a number of details, including user info (name, company, address, e-mail, phone etc.), hardware ID, activation period (if required) and license type. When it comes to the latter, you can choose between a text, floating text and key (basic, cryptographically secure or online). Batch processing, sending mails and export capabilities It is also possible to create multiple licenses in the same time, with the help of a previously created template. After generating them, you can easily bring up the source code and copy it to the Clipboard, tests the licenses and export them to a proprietary format (L4J), CSV or XLSX. You can send the created items to people through an SMTP server while also configuring the message, so as to convey a particular tone. Backup and restore capabilities are also offered, so that you can easily prevent sudden data loss. Conclusion To wrap it up, License Manager is a pretty efficient piece of software when it comes to generating product licenses. The interface is intuitive, the response time is good, the system's performance is not going to hampered and our tests did not reveal hangs, errors or freezes. Description: The installation process is exceptionally simple, only offering to download a few components, but the actual software does not seem to be pre-configured. In any case, it is a free tool that you can use to ensure license, product key and serial number have

been correctly transferred to your customer's machine. You can send them through an SMTP server or generate them locally on the same PC where the end-user is.

Simplicity and ease of use The software is really simple to use, having a clean, minimalistic interface, which is integrated with the Help menu, giving you the chance to keep informed of any step of the installation process. It also comes with a time-saving feature, which creates a new license whenever the user opens the software. The installation process can only be done by connecting to a web server, which also offers you the

System Requirements For License4J License Manager:

Windows 7/8/8.1 Mac OS X 10.5.8/10.6.8 1 GHz processor 2 GB RAM (4 GB if using the game client) 1 GB free HDD space
