AutoCAD History AutoCAD's simplified user interface and multi-touch display makes it easier to learn and easier to work with than the earlier Intergraph software. If you look at the invention patents in AutoCAD, you'll find that the first one was awarded to Dr. A. Lohr and Dr. V. Y. Tew on June 11, 1978. The original patent was titled "Multi-Touch Display System for Displaying Pairs of Coordinate Data" and was filed on
