E-Capsule Private Mail HD Crack Full Product Key Free Download PC/Windows Latest

E-Capsule Private Mail HD Crack + Product Key Full Free [Win/Mac]

e-Capsule Private Mail is today the only portable and zero-footprint application that combines strong (military-level) encryption with the ability to manage the users' digital identities. In fact, using e-Capsule Private Mail you will be able to generate your own digital certificates (in standard X509 format) and to use them to send/receive encrypted e-mails and to digitally sign messages. You can even export these certificates and use them in other e-mail clients, such as Microsoft® Outlook. e-Capsule Private Mail HD General: e-Capsule Private Mail is a powerful and multi-functional portable e-mail client for email messages containing digital certificates in standard X509 format. The application makes use of some of the most advanced security features, including strong encryption, digital signatures, authentication and private key management. - The application is portable and can be run from your USB storage stick, giving you the added mobility of always having access to your e-mail messages on the go, in any location you decide to use. - The application is based on the principle of "zero-footprint", that is, after you quit your e-Capsule

Private Mail application on the host PC, no trace is left of the session itself on your host PC. The application stores all messages and other information used by the application (e.g. the address book entries) in encrypted format at all times. Thus, all private information is kept encrypted even when you need to use it and it is made available only internally to the e-Capsule Private Mail application. - The application has a custom user interface, optimized for its specific tasks. The interface is designed to let you manage the users on the session directly. In fact, e-Capsule Private Mail stores all information about the users on the session in encrypted format and, thus, it is accessible only internally to the e-Capsule Private Mail application. - The application is completely self-contained and does not require any installations or additional software to be installed on your PC. The software works in the background without affecting system resources and consumes no hardware/disk space. - The application, being based on the Trusted Computing Base (TCB), uses the Secure Element technology, available in some new PCs. This means that, if the PC is equipped with the technology, this can be used for smart card authentication (Smart Card Passport) and for access control features.

E-Capsule Private Mail HD

New features: Zero-footprint: Everything is encrypted: 1. Text messages are converted into a form that is completely unreadable by anyone 2. The address book is stored in encrypted format; 3. The message thread/items are converted into a form that is completely unreadable by anyone. 4. The keys used to encrypt/decrypt a e-mail are stored in the e-mail account, preventing them from being recovered by any method (e.g. recovery by password, recovery by password recovery, recovery by user name, recovery by keyloggers, etc.); 5. Any alias data used by the e-mail client is encrypted/decrypted as well./** *********************************** * Copyright (c) 2000, 2016 IBM Corp. and others * * This program and the accompanying materials are made available under * the terms of the Eclipse Public License 2.0 which accompanies this * distribution and is available at * or the Apache License, Version 2.0 which accompanies this distribution and * is available at * * This Source Code may also be made available under the following * Secondary Licenses when the conditions for such availability set * forth in the Eclipse Public License, v. 2.0 are satisfied: GNU * General Public License, version 2 with the GNU Classpath * Exception [1] and GNU General Public License, version 2 with the * OpenJDK Assembly Exception

E-Capsule Private Mail HD

Q: Why do I need e-Capsule Private Mail? A: You need e-Capsule Private Mail HD because you prefer to use your precious PC more efficiently and to avoid sharing it with others. Q: What could be the benefits of using e-Capsule Private Mail? A: AES256 encryption means that your e-Capsule Private Mail session is protected RSA2048 means that your e-Capsule Private Mail session is protected You are able to have your own digital identity You can send/receive e-mails using your own digital identity You are able to manage your digital identity (e.g. certificates creation) Full email encryption means that your messages are stored using AES256 Full email encryption means that you are protected using RSA2048 When an e-mail is encrypted, it is destroyed. If you get an e-mail encrypted by e-Capsule Private Mail, you will never be able to retrieve it by any means. If you receive a non-encrypted e-mail, you will be able to store it anywhere you want to. e-Capsule Private Mail Prodigy - Private e-mail - Prodigy e-mail private - Prodigy email private Secure e-mail - Prodigy e-mail private Secure e-mail Prodigy e-mail -Prodigy e-mail private - Prodigy e-mail private Secure e-mail - Prodigy e-mail private Secure e-mail Prodigy e-mail -Prodigy e-mail private - Prodigy e-mail private Secure e-mail - Prodigy e-mail private Secure e-mail Prodigy e-mail -Prodigy e-mail private - Prodigy e-mail private Secure e-mail - Prodigy e-mail private Secure e-mail Prodigy e-mail -Prodigy e-mail private - Prodigy e-mail private Secure e-mail - Prodigy e-mail private Secure e-mail Prodigy e-mail -Prodigy e-mail private - Prodigy e-mail private Secure e-mail - Prodigy e-mail private Secure e-mail Prodigy e-mail -Prodigy e-mail private - Prodigy e-mail private Secure e-mail - Prodigy e-mail private Secure e-mail Prodigy e-mail -Prodigy e-mail private - Prodigy e-mail private Secure e-

What's New In?

e-Capsule Private Mail HD is the first product of its kind that fully combines the following capabilities: •zero-footprint encrypted e-mail exchange and storage •digital identities •cryptography and zero-footprint encryption •unconstrained mobility and communication It is not an e-mail client like any other, as it is designed to not leave a trace of its uses on the system you are using at the moment. Zero-

footprint technology is a key enabler of its features as it means that no trace of the session is left on the host computer. The e-Capsule Private Mail HD application uses various features and features of the operating system (OS) to achieve this effect. Each e-Capsule Private Mail session on the host computer is represented by a special entry in the OS register and the data is stored in a special encrypted and isolated subdirectory. After you quit the application, neither the active e-Capsule Private Mail sessions nor any trace of your messages will be left on the host PC. Furthermore, no one will ever be able to retrieve or access any trace of the e-Capsule Private Mail sessions. To be able to generate the certificate to be used for the e-Capsule Private Mail HD, you will be required to follow instructions for the unique certificate generation application provided in the installation package. Please note that every e-Capsule Private Mail HD session creates and stores on your computer a special e-Capsule Private Mail HD folder. For every e-Capsule Private Mail HD session, there will be three special subfolders inside this special e-Capsule Private Mail HD folder: •signed_mime_embedded_part – raw mime part of the mail message which has been signed with your certificate, •signed_certificate_signing_cert – your e-Capsule Private Mail HD certificate which has been validated by the e-Capsule Private Mail HD application, •private_key – your private key which was used to generate the signed_certificate_signing_cert, The directory and subfolders in the special e-Capsule Private Mail HD folder will remain closed even when you close e-Capsule Private Mail, and they are closed even when you restart your PC. e-Capsule Private Mail HD is a significantly different product compared to any other current e-mail client.

System Requirements:
