Layers: Don't lose important information. Layers make it easier to keep track of the information you need in your drawing. Layers include objects, attributes, dimensions, and annotations—each visually represented by a distinctive symbol. (video: 3:30 min.) **Erasing:** Erase mistakes or clean up edits. Erase, redraw, and update multiple objects at once in one simple step. Erase multiple objects with a brush, such as shape and text, and without creating a separate object. Redraw mistakes in current drawing objects that you had saved and have modified. (video: 3:00 min.) **Arc Tools:** Make sharp curves with precision. Create parallel and orthogonal arcs with precision using the Arc tools. Set and change the radius of the arc at any point. This helps to create a smooth, professional result. (video: 3:30 min.) **Object Properties:** Quickly access properties for drawings. Quickly access properties for blocks, dimensions, and annotations. With the Object Properties window, you can edit or review properties for drawing objects. You can also organize the properties into lists to help you find the properties you need. (video: 1:30 min.) **New: Three-Dimensional Modeling:** Edit 3D models on the go. Use a 3D application, such as CADx, to create models of custom or standard parts. (video: 2:30 min.) **New: Dimensioning and Texting:** Dimension and text at any point. Quickly add dimensions and text to a drawing. View the dimensioned and texted object as a block and edit the object. (video: 2:00 min.) **Other:** Quickly position objects. Draw and place objects in a document in just a few clicks. Use the Snap-To and Visual Position tools to quickly and precisely place objects in a drawing. (video: 3:00 min.) **New: Dimensioning and Texting:** Edit and manage dimensioning and text settings. Manage dimensioning and text settings and use them in the document. (video: 2:30 min.) **New: Drawing Overlays:** Draw in the background. Drawing overlays let you create a new drawing in the background of your current drawing. You can use drawing overlays to create a blueprint, or design a
