=====
Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. The confinement of individual fluorescent molecules inside optical traps promises to improve the detection of single molecule events in fluorescence microscopy. Therefore, detailed considerations of the experimental conditions are of great importance. Toward these goals, we review the most important aspects of the development of two-color single molecule microscopy (SCSM). We discuss the identification of possible background fluorescence, the effect of photon shot noise, and the optimization of the multiple photon excitation probability for the construction of blinking images. We have incorporated the relevant aspects of SCSM into a suite of Monte Carlo simulation-based techniques that can be used to design appropriate experimental parameters and to quantify experimental errors.Q: Can't fix my "too many values to unpack (expected 3)" error Im using the class of a previous year course, it was on "Python programming" but actually it was about "Reading and Writing CSV files", anyway it explains what I mean.
